

# Release Notes

Release Date: 8/23/2022

## ADMIN

- BUG FIXES
  - Resolved an issue where multiple instances of the same provider could be selected for a driver.

## TORQUE

- FEATURES
  - Added a version selection to the Eleos configuration that works with Geotab. See image, “Eleos Version Selection.”
  - Added hours of service (HOS) for the Truckmate provider to the TORQUE client.
  - Combined positions and locations with diagnostics odometer readings for Samsara and TMS integrations.
  - Created a home screen in the TORQUE client for a customer.
