Release Notes

Release Date: 10/4/2022

ADMIN

- FEATURES
    - Removed some placeholder text from the driver profile.
    - Updated the driver group functionality to require that users or user groups be assigned in order for the group to be visible.

GAUGE

- FEATURES
    - Added a new view for the Daily HOS Summary.
    - Updated the date selector for many of the reports adding more choices and functionality.
    - Updated the Driver Manager Review report.

IDENTITY

- FEATURES
    - Added primary and secondary departments to user profiles for use with the Document Review feature.[‡] See image, "Primary and Secondary Departments."
- BUG FIXES
    - Fixed a sizing issue with the user interface for the Departments tab.
    - Resolved a problem with editing a business unit logo if one already exists.

RELAY

- FEATURES
    - Enhanced group messaging by allowing a list of driver IDs to be pasted into the Driver(s) field. See image, "Paste Driver IDs for Group Messaging."
    - Implemented preventative measures for messages being sent or received from drivers who have been disabled.
- BUG FIXES
    - Fixed a bug where messages sent with a date in the future did not appear.
    - Fixed a problem with the latest unread messages being duplicated.
    - Resolved an issue where a user sending a group message had the focus change to a new, individual message.

[‡] Implementation of this feature incurs an additional cost and may not be available for all customers. Please contact your Motorcity Systems representative for more information.

We value your feedback! If you have a question about a product or feature, or have something to share with the team, please contact your Motorcity Systems representative or send an email to support@motorcity.systems.

- o Resolved an issue where characters being pasted into the Search field broke the search functionality.
- o Resolved an issue where scrolling up in the Message History duplicated the topmost message.

TORQUE

- FEATURES
  - o Added date tracking so that messages from the current signed in driver are shown and not the previous driver for the ORBCOMM provider.
  - o Added in duplicate message checking for the ORBCOMM provider.
  - o Added pre-defined order update messaging to drivers for the Eleos provider.
  - o Updated the time-to-live (TTL) logic for the Eleos provider.
